PROFESSIONAL horse line NUTRITION & CARE

ABOUT OUR BRAND

HorseLinePRO is a Polish manufacturer of professional compound feed and regenerating cosmetics for horses. The composition of feed and the concentration of active ingredients in the daily dose were determined on the basis of clinical research, which confirms that our products are highly effective. Raw materials used to manufacture our products have certificates which confirm their highest quality. HorseLinePRO products are effective thanks to numerous tests and cooperation with the best competition riders, farriers, physical therapists and veterinarians.

HorseLinePRO products

Locomotor system

Liver Care

Nervous system

CBD, Chillout

HorseLinePRO Boswellia Serrata

This tested composition of MSM, boswellic acid and vitamin C quickly regenerates the whole equine locomotor system after physical activity. It reduces muscle and joint stiffness. It has a beneficial effect on pain of rheumatic and arthritic origin.

Packaging:
500g, 900g, 2000g

TREATMENT
**25, 45 and 100
DAYS**

Use:

- to reduce muscle and joint stiffness
- to speed up the regeneration process after a training session
- to inhibit inflammatory mediators

HorseLinePRO Chondro Protect

This product supports the proper functioning of joints, improves their condition and has a positive effect on tissue regeneration. ChondroProtect provides the articular cartilage with all the necessary nutrients and increases its resistance to micro-trauma.

Packaging:
900g

TREATMENT
30 DAYS

Use:

- to provide joints with nutrients
- to reduce muscle and joint stiffness (problems with relaxing)
- to inhibit inflammatory mediators
- to improve the properties of synovial fluid

HorseLinePRO Chondro Clinic

The active ingredients of this product (glucosamine and chondroitin) nourish the joints and thanks to the addition of the devil's claw extract the product is also recommended as a dietary supplement in the case of pain and inflammation. The product is recommended especially to horses which suffer from degenerative disorders affecting the skeletal and joint system (bone spavin, the navicular syndrome), osteoporosis, rheumatism and arthritis.

Packaging:
690g

TREATMENT
30 DAYS

Use:

- to take care of diagnosed degenerative changes
- to recover from an injury
- to improve the mobility of joints and alleviate pain

Discontinue the treatment 5 days before a competition.

HorseLinePRO Chondro+HA

A specialist product which helps restore the natural amount of synovial fluid. A nourishing combination of low molecular weight hyaluronic acid, glucosamine hydrochloride and chondroitin sulphate. It prevents and eliminates stiffness in the locomotor system, protects in against excessive exploitation and has a positive effect on regeneration.

Packaging:
2 x 1000ml

**TREATMENT 30
DAYS**

Use:

- to provide joints with optimal nutrients
- to reduce the risk of joint damage
- to accelerate the regeneration of joints
- to improve the properties of synovial fluid

HorseLinePRO ChondroVet +HA

A professional and highly effective product recommended as a dietary supplement in the case of osteoarthritis, recovery after orthopaedic treatments and a dysfunction of the locomotor system. It is also recommended as a dietary supplement for competition horses whose locomotor systems are heavily burdened. A high concentration of active ingredients in the daily dose helps effectively nourish joint structures.

Packaging:
1200g

TREATMENT 42 DAYS

Use:

- to deal with dysfunctions of the bone and joint system
- to improve the properties of synovial fluid
- to deeply nourish the locomotor system

HorseLinePRO Devil's Claw

A highly effective product based on devil's claw extract. It is widely used in natural treatment of pain and inflammation of muscles and joints. It significantly increases the joy of movement and makes it more smooth.

Packaging:
300g, 700g

**TREATMENT
30 and 70 DAYS**

Discontinue the treatment 5 days before a competition

HorseLinePRO Collagen

Hydrolyzed collagen protein with high bioavailability is the building block of tissue all over the body. It increases the durability and flexibility of the connective tissue. It helps prevent the depletion of the articular cartilage, enables the body to better absorb mineral substances and increases the density of the bone tissue. It also improves the appearance of the skin, coat and hooves.

Packaging:
300g, 800g

**SUPPLEMENTATION
37 and 100 DAYS**

Use:

- to protect and regenerate the locomotor system
- to improve the condition of the coat and hooves
- to support joint mobility

HorseLinePRO MSM

MSM (methylsulfonylmethane) is a biogenic sulphur compound. It has a significant regeneration effect on cartilaginous tissue in joints. It supports the structure of tendons, ligaments and muscles. It participates in the synthesis of collagen and keratin. Sulphur deficiencies cause the stiffness of soft tissue. It reduces oxidative stress, supporting the body during physical activity, for example a competition.

Packaging:
500g, 700g, 1300g, 3000g

**SUPPLEMENTATION
50, 70, 130 and 300
DAYS**

Use:

- to protect and regenerate the locomotor system
- to accelerate regeneration during competitions and training sessions
- to deal with muscle and joint stiffness
- to support the regeneration of tendons and ligaments after injuries

Jarosław Skrzyczyński

3-times winner of Polish Senior Championships
and the First Polish Vice-Champion of 2020

Recommended by
Jarosław Skrzyczyński

HorseLinePRO TendonFlex

A combination of ingredients with high absorption which support tendons and ligaments. It is an important dietary supplement during recovery and after soft tissue injuries. The active ingredients of the product have a beneficial effect on proper tissue nutrition and strength, which supports regeneration processes and provides protection. Doping free product.

Packaging:
900g, 1500g

TREATMENT
30 and 50 DAYS

Use:

- to nourish the soft tissue of the locomotor system
- to support the recovery of tendons after an injury
- to increase the durability and flexibility of the connective tissue

HorseLinePRO Biotin Max

The product has an increased content of biotin and DL-Methionine, as well as a copper to zinc ratio appropriate for horses. It helps build an extremely strong and healthy structure of the hoof wall. To make this product, we used top-quality raw materials and micro-nutrients in the form of chelates, which are characterised by high bioavailability, so the product quickly and effectively complements deficiencies.

Packaging:
500g, 1000g, 3000g

SUPPLEMENTATION
50, 100 and 300 DAYS

Use:

- to solve problems with a cracking or breaking hoof wall
- to deal with a slowly growing and inflexible horn hoof

HorseLinePRO Hoof's Help

It is a product with carefully chosen ingredients, created especially for horses whose hooves are in a very bad condition (cracks, inflammation, infections of the white line) and need to be strengthened quickly. A high concentration of active ingredients (biotin, DL-Methionine, chelated zinc and copper, MSM) guarantees great results. The product accelerates the growth of the horn hoof and strengthens the hoof wall and sole.

Packaging:
1500g, 3500g

TREATMENT
90 and 210 DAYS
(winter season)

Use:

- to treat hooves which require extremely quick regeneration
- to recover from laminitis
- to treat a hoof wall which is inflamed, cracks or has a puncture wound

HorseLinePRO Hoof Balm

A concentrated hoof serum which stimulates intensive hoof regeneration and nutrition. It makes the hoof more flexible, protects it against pathogens, maintains long-lasting hydration and prevents cracks and dryness.

Packaging:
600ml

Use:

- to intensively regenerate hooves
- to nourish hooves and make them more flexible
- to achieve a long-lasting effect

Ingredients:

beef suet, castor oil, avocado oil, linseed oil, shea butter, macadamia oil, argan oil, vitamin E, vitamin A

THE EFFECTS OF USING HOOF'S HELP

HorseLinePRO CBD

The inflorescence of Cannabis sativa in the form of pellet with 0.5% CBD content. Free from psychoactive substances (THC<0.2%). Recommended for skittish, young, nervous and hyperactive horses. It helps alleviate stress symptoms of various origins (e.g. training, recovery, transport, changing the stable).

Packaging:
1500g, 2500g

Discontinue the treatment
7- 10 days before a competition.

Use:

- ▶ to alleviate anxiety symptoms
- ▶ to alleviate pain and inflammation
- ▶ to help the horse calm down and concentrate

Ingredients:

Inflorescence of Cannabis sativa, CBD 0,5%, TCH < 0,2%

HorseLinePRO Vitamin C

Vitamin C (L-ascorbic acid) has antioxidant properties and a positive effect on maintaining the physiological balance of the connective, cartilaginous and bone tissue, as well as on the production of collagen, elastin and hyaluronic acid. An increased need for vitamin C occurs in stressful situations (transport, competitions), when training sessions are more intense, when there is no access to pasture, during recovery (after illnesses), in the case of general weakness and when the horse has an allergy.

Packaging:
600g, 1000g

SUPPLEMENTATION
30 and 50 DAYS

Use:

- ▶ when training is more intense
- ▶ when immunity is reduced
- ▶ when access to pasture is limited

HorseLinePRO Beta-Glucan

A rich composition of natural B vitamins with a high level of beta-glucans (80%) and mannan-oligosaccharides (MOS), isolated from brewer's yeast (*Saccharomyces cerevisiae*). It is a very important dietary supplement during recovery (after illnesses and injuries) and during general weakness. It significantly improves the immune response.

Packaging:
300g, 600g

SUPPLEMENTATION
30 and 60 DAYS

Use:

- ▶ to deal with a drop in physical fitness
- ▶ to recover after illnesses
- ▶ to deal with reduced immunity
- ▶ to tackle allergies

HorseLinePRO ImmuneMax

It effectively triggers the immune response of the whole body, regardless of the source of the problem. Recommended when there is a drop in physical fitness, in the case of lowered exercise performance and in stressful situations, such as transport, competitions, staying in a veterinary clinic, changing a stable.

Packaging:
450g

TREATMENT 30
DAYS

Use:

- ▶ to deal with reduced immunity
- ▶ to deal with a drop in physical fitness
- ▶ to recover from previous and recurring illnesses
- ▶ to deal with allergies

HorseLinePRO VitaMax

A comprehensive composition of vitamins and mineral ingredients especially for horses. Made of high-quality raw materials that have not been genetically modified. The product has a positive effect on improving physical fitness and regenerating the body during increased physical activity, pregnancy and lactation, as well as after an illness. It supports the proper functioning of the body and supplements the diet with nutrients essential for health. It is recommended especially in the case of a diet based mostly on hay and oat.

Packaging:
2500g, 5000g

SUPPLEMENTATION
50 and 100 DAYS

HorseLinePRO VitaFlex

A collection of highly absorbable vitamins, minerals and chondroprotective substances which supplement the diet of active horses used in sport. Glucosamine, chondroitin and MSM support the proper functioning of the locomotor system. This collection of necessary vitamins, macronutrients and micronutrients has a positive effect on physical fitness and the regeneration of the body during intense physical activity.

Packaging:
2000g, 5000g

SUPPLEMENTATION
32 and 80 DAYS

HorseLinePRO Grow Up Vital

A mix of vitamins and minerals created to ensure the proper growth and development of foals and weanlings. The product contains substances which nourish the joints, such as glucosamine, chondroitin and collagen, which serve as the building blocks of the whole locomotor system. A proper supply of active ingredients when the body is growing and developing helps minimise the risk of dysfunctions of the bone and joint system.

Packaging:
2000g, 5000g

SUPPLEMENTATION
40 and 100 DAYS

HorseLinePRO Copper Max

A product for horses which contains chelated copper. It supplements a diet low in this element. Copper has a beneficial effect on keeping the connective tissue (ligaments, tendons) in a good shape and on the maturation of articular cartilages. It also facilitates the process of transporting iron around the body.

Packaging:
310g

Use:

- to treat abnormal pigmentation of the fur, mane and tail
- to deal with hooves in poor condition
- to replenish deficiencies confirmed by blood tests

HorseLinePRO Respirol

This product neutralises mycotoxins which cause diseases and may lead to respiratory failure in horses (allergies to dust and mould). Respirol actively binds mould spores from immediate surroundings (bedding, feed) and helps remove mycotoxins from the body, which improves the physical fitness and performance of competition and breeding horses.

Packaging:
600g, 1200g

SUPPLEMENTACJA
30 and 60 DAYS

Use:

- to improve respiratory performance
- to improve the physical fitness of working horses
- to prevent the growth of fungi and bacteria
- to limit the effects of mould spores on internal organs

HorseLinePRO Muscle Maker

A dietary mix which supports the process of quickly building healthy and strong muscles. It significantly strengthens muscles, reduces their recovery time and prevents rapid fatigue, improving the decomposition of lactic acid.

Packaging:
1050g

TREATMENT 40 DAYS

Use:

- to develop healthy and strong muscles
- to quickly regenerate the muscle tissue
- to increase muscular strength and endurance

HorseLinePRO Garlic

Natural product for horses made of ground garlic (*Allium sativum L.*). It has bactericidal and bacteriostatic properties, which is why it supports the immune, digestive and respiratory systems (for example in the case of viral or fungal respiratory infections). When taken regularly, it improves the natural protective barrier against insects.

Packaging:
800g, 1400g

SUPPLEMENTATION
40 and 70 DAYS

Use:

- to provide insect protection
- to support:
 - the immune system
 - the respiratory system
 - the digestive system

HorseLinePRO Zinc Max

This product contains chelated zinc. It supplements a diet low in this element. The symptoms of a zinc deficiency include skin infections, hair loss, brittleness and low quality of the hoof horn. Moreover, zinc has a beneficial effect on the mucous membrane (stomach, intestines).

Packaging:
345g

Use:

- to treat skin problems
- to deal with a brittle and fragile hoof wall
- to replenish deficiencies confirmed by blood tests

HorseLinePRO Algea

Norwegian algae have a powerful nutritional value. They are the richest source of organic vitamins, minerals and trace elements. They are rich in iodine, which is an important dietary ingredient for horses living in areas with a moderate or small iodine deficiency. Rich in amino acids, they support muscle development, increase the growth rate of the hoof horn and improve the quality of hair and skin.

Packaging:
1500g

SUPPLEMENTATION
50 DAYS

Use:

- to deal with iodine deficiency (cough, apathy, excessive molting)
- to supplement the diet with vitamins and minerals
- to improve the condition of hooves, skin and hair

HorseLinePRO FlyOut

A natural herbal supplement free from GMO and pesticides, whose regular supply changes the body odour of a horse (due to a high level of polyphenols – broad-spectrum volatile aromatic substances) and makes it less attractive for external parasites, such as mosquitoes, horseflies and ticks. It is a rich source of antioxidants and its regular use significantly supports natural immunity.

Packaging:
700g, 1500g

TREATMENT
30 and 64 DAYS

Use:

- to protect horses against mosquitoes, horseflies and ticks
- to provide a rich source of antioxidants
- to reduce allergic reactions

HorseLinePRO Electrolyte Power Plus

A specialist product for competition horses used as a dietary supplement during periods of intense physical activity. It reduces the recovery time, boosts energy and supports the optimal performance of the body during long-lasting physical activity. The right proportion of elements supplements the deficiencies of minerals lost with sweat, thanks to which the right electrolyte balance is maintained.

Packaging:
1500g, 3000g

SUPPLEMENTATION
35 and 70 DAYS

Use:

- to reduce the regeneration time after physical activity
- to maintain the right electrolyte balance
- to provide a source of quickly released energy

HorseLinePRO HydroFocus Electrolyte

It restores the electrolyte balance of the body, reduces the regeneration time and significantly improves the performance and physical fitness of the horse. The electrolyte balance is disturbed when the body loses fluids. It may lead to a drop in functional performance, general weakness, muscle dysfunction, dehydration, loss of appetite and weight loss.

Packaging:
1000ml

When should a horse's diet be supplemented with HydroFocus?

In the case of:

- excessive sweating
- intense physical activity
- potential electrolyte imbalance

The best electrolyte proportions for horses 2:2:1 (Cl:Na:K)!

Julia Jaglarz

Polish First Vice-Champion of Young Riders 2020

Recommended by
Julia Jaglarz

HorseLinePRO Chillout

A product intended for hyperactive horses to alleviate tension and help them concentrate on training. The active ingredients of the product contribute to quickly restoring the mental balance of horses during periods of nervous tension, anxiety and stress caused by working, training and competing. The product is also aimed at horses in recovery whose movements are limited.

Packaging:
720g

SUPPLEMENTATION
30 DAYS

Use:

- to reduce nervous and muscular tension
- to help the horse concentrate in stressful situations
- to support the functioning of the nervous system

HorseLinePRO Lymphatic

A doping-free product, used to help the limbs recover after physical activity. When it is used regularly, it improves the lymph flow, thanks to which it prevents congestive, inflammatory, oncotic and lymphatic oedema. It removes harmful metabolites from tissue, visibly reduces swelling and supports the lymphatic system. DOPING FREE!

Packaging:
600ml

Use:

- to regenerate limbs after physical activity
- to reduce swelling (congestive and post-traumatic oedema)
- to improve the lymph flow

HorseLinePRO Ice Gel

A regenerating product for competition horses, used to enable immediate biological regeneration of limbs after physical activity. It has strong anti-swelling properties, brings a cold relief and effectively improves blood circulation in strained and tired limbs.

Packaging:
650ml

Discontinue the treatment 3 days before a competition.

Use:

- to ensure a long-lasting cooling effect
- to regenerate limbs after physical activity
- to reduce swelling

HorseLinePRO BuzzSpray

A fully natural product which effectively keeps away flies, midges, mosquitoes, deer flies and ticks. The product does not contain chemical detergents, preservatives or any substances toxic for people or animals. It does not contain genetically modified organisms. It does not cause coat discolouration. Since it does not irritate the respiratory tract (it is not a toxic or insecticidal substance), the product is safe for competition horses, horses with respiratory disorders, pregnant mares and foals.

Packaging:
750ml

Apply the product every day before going to the pasture or starting a training session and you will see immediate results!

HorseLinePRO Warm It Up

A liquid product with a two-phase cooling and warming effect, intended for external use in horses. It firstly cools down and then gently warms up the skin, which has a positive effect on microcirculation and blood flow in areas where the product has been rubbed into the skin, thus accelerating regenerating processes. It quickly and effectively relieves strained parts of the body, giving the horse a feeling of relaxation. It prevents swelling and has analgesic and anti-inflammatory properties.

Packaging:
750ml

Discontinue the treatment 3 days before a competition.

Use:

- to massage tense parts of the body
- to stimulate blood circulation in soft tissue
- to regenerate limbs after physical activity

Paweł Spisak

9-time winner of Polish Senior Eventing Championships

Recommended by
Paweł Spisak

HorseLinePRO Ice Clay

Natural clay based on mountain arnica extract with strong swelling reducing properties. It supports regeneration, quickly bringing relief to tired and strained limbs. It accelerates the absorption of haematomas, inflammation and swelling of various origins. It also alleviates rheumatic disorders and joint pain. The product also contains boswellic acids and MSM, which accelerate tissue regeneration.

Packaging:
1400 g

Use:

- to regenerate and relax limbs after physical activity
- to reduce swelling caused by contusions, injuries or problems with blood circulation
- to help the body absorb bruises and haematomas

HorseLinePRO Probiotic

A product which enriches and stabilises the microbiota of the digestive system, which is responsible for proper digestion. It is recommended when the diet is changed, during drug or antibiotic treatment and when you want to prevent problems related to reduced immunity and improper metabolism.

Packaging:
1000ml

TREATMENT 18 DAYS

Use:

- to neutralise pathogenic microbiota
- to support digestion
- to limit the symptoms of abnormal digestive system activity

HorseLinePRO Gastro Care

A product which supports the proper activity of the digestive system in horses. Recommended to supplement the diet during antibiotic therapy, after deworming, colics and food poisoning. It improves digestion, cleansing the body of toxins and the secretion of digestive juices and bile. It also has probiotic properties and supplies natural B vitamins.

Packaging:
700g

TREATMENT 46 DAYS

Use:

- to support the digestive system
- to improve liver activity
- to support the regeneration of liver cells

HorseLinePRO Liver Care

A product which improves the physiological functions of the liver and supports the detoxification of the body. The substances it contains stimulate the production of bile and have a positive effect on the regeneration of liver cells. Silymarin stimulates detoxification and the creation of new hepatocytes. Cynarine stabilises cholesterol levels and improves liver functions. LiverCare is recommended to supplement the diet during antibiotic therapy and the administration of drugs that can damage the liver (anti-inflammatory drugs, pain killers, steroids), as well as after deworming, colics and food poisoning.

Packaging:
600g

**SUPPLEMENTATION
30 DAYS**

Use:

- to support liver regeneration
- to detox the body
- to improve the functioning of the digestive system
